

Harvard-Smithsonian Conference: Dynamics from the Galactic Center to the Milky Way Halo

Contributed by Administrator
Friday, 12 February 2010

The Sixth Harvard-Smithsonian Conference on Theoretical Astrophysics entitled " Dynamics from the Galactic Center to the Milky Way Halo" is being held 10 - 13 May 2010 in Cambridge, MA, USA.

Topics to be discussed include:

- Dynamics of S Stars
- Hypervelocity Stars
- Stellar Cusp
- SgrA*
- Kinematic Parameters of the Galaxy
- Modeling of the Galactic Disk
- Galactic Distribution of Planets
- Galactic Dark Matter
- Dwarf Galaxies
- Black Holes in Globular Clusters
